

A Few Reasons Why The Electors Of South Norfolk Should Vote For Mr. John Stuart And Reject Mr. Walla

xxxj BOSTON TO WASHINGTON 131

of course, a good deal of guesswork, and unless they know the subject of conversation, they are likely to make great mistakes.

Many persons cannot understand how it is possible to convey all kinds of abstract ideas by means of gestures or signals as quickly and as certainly as by vocal sounds. But in reality the former has some advantages over the latter, and is equally capable of unlimited extension and the expression of new ideas, by a modification of familiar symbols. If we consider how easily we convey the idea, "Don't speak," by putting the fingers to the lips; "yes" or "no" by the slightest motions of the head; "come" or "go" by motions of the hand; "joy" or "sorrow" by the expression of the face; "a child" or "a man" by holding the hand at the corresponding height; weakness of mind by tapping the forehead with the finger, we can see how a system of signs and gestures may be gradually built up as surely as have been the vocal sounds of all the various languages of the world. And such a system *has* been built up, and is so complete that a spoken lecture upon any subject whatever can be translated into gestures so as to be perfectly understood and enjoyed by an audience of deaf-mutes. Of course, proper names and the less common technical terms are given by rapidly spelling out the word by letter-signs. No doubt the power of speaking and lip-reading is by far the more valuable for the deaf-mute, since it enables him to communicate with the outside world; but as a means of familiar intercourse with each other, the gesture language is the most certain and the most enjoyable. Both require light, but the latter, involving motions of the limbs and body, can be understood at a greater distance and with less strained attention.

The students trained in this college have no difficulty in finding employment. Some become teachers to the deaf, but others are editors or journalists, clerks, surveyors, draughtsmen, mechanics, etc. I saw one of the younger pupils being taught to speak, which requires immense patience and perseverance in the teacher, and in some cases
