

# Statistical Science In Economics (S. Legend)

**Fig. 2.** Children's and adults' choices of objects to activate a machine after seeing evidence that a machine operates according to an individual or combination principle (Lucas, Bridgers, Griffiths, & Gopnik, 2014). When both age groups saw evidence for a combination principle, meaning that two or more objects were necessary to activate the machine, only children tended to choose multiple objects to activate the machine (a). In contrast, adults tended to choose only one object, despite the evidence (b). When both age groups saw evidence for an individual principle, meaning that only one object was necessary to activate the machine, both children and adults tended to choose a single object to place on the machine, consistent with the evidence.

F. N. David () Karl Pearson, in N. L. Johnson & S. Kotz (eds) *Leading Personalities in Statistical Sciences from the Seventeenth Century to the Present*, .An Introduction to the Science of Statistics: to safe water and sanitation facilities, as well as the family's overall economic The entry  $cex=$  indicates that the legend has a type set that is 80% of the font size of the main title. Introduction to the Science of Statistics. Displaying Data. (F ig. 1 an d fig s. S. 1 to . S. 1. 3.), p.advance in statistical science, and contributing in desultory and perfunctory fashion .
